Geometry (from the Ancient Greek: $\gamma\epsilon\omicron\mu\epsilon\tau\epsilon\rho\alpha$, $\gamma\epsilon\omicron$ -"earth", -metron "measurement") is a branch of mathematics concerned with questions of shape, size, relative position of figures, and the properties of space.

Topology and geometry General topology. In general topology, an embedding is a homeomorphism onto its image. More explicitly, an injective continuous map $f: X \rightarrow Y$ between topological spaces and is a topological embedding if f yields a homeomorphism between X and $f(X)$ (where $f(X)$ carries the subspace topology inherited from Y). Intuitively then, the ...

In geometria differenziale il tensore di Ricci R_{ij} un tensore che misura la curvatura di una varietà riemanniana. Si ottiene contraendo due indici del tensore di Riemann.

In geometria differenziale, il tensore di Riemann R_{ijkl} un tensore di tipo (1,3) che codifica nel modo più completo la curvatura di una varietà riemanniana.

En geometría y topología, una variedad diferenciable es un tipo especial de variedad topológica, a la que podemos extender las nociones de cálculo diferencial que normalmente usamos en \mathbb{R}^n . En una variedad diferenciable M podremos definir lo que es una función diferenciable: $f: M \rightarrow \mathbb{R}$, y campos de tensores diferenciables (incluidos campos de vectores).
