The structural testing is the testing of the structure of the system or component. Structural testing is often referred to as "white box testing" or "glass box" or "clear-box testing" because in structural testing we are interested in what is happening "inside the system/application".

Qualitative Phase Analysis. Because the positions of the peaks in a powder pattern are determined by the size, shape, and symmetry of the unit cell and the peak intensities are determined by the arrangement of atoms within the cell, the powder pattern is a characteristic "fingerprint" of a phase.
